

University of Arkansas STAT6393V - Week 4

Week 4 - Assignment 4: Estimating Australia Electricity Demand

Group 2: Carlos, Landon, and Elias.

2026-06-18

Introduction

This assignment contains 2 different questions.

1. Getting UQ based on empirical quantiles The `bnn_predict` function in the Bayes by backprop section looked like this:

```
# bnn_predict <- function(model, x_new, n_sample = 1000) {
```

2. Getting UQ based on quantiles of the predictive distribution The `bnn_predict` function in the Bayes by backprop section looked like this:

Answer 1:

Basics and setup

Answer 2:

Basics and setup
